

INTERNSHIP SYNOPSIS

Name: Niranjan bhat

USN: 4NI21CS064

Sem & Section: 4th sem B section

Mobile No.: 9980711961

Brief Description

As an intern at Government Higher Primary School Gonuru, my primary responsibility is to develop a comprehensive full-stack web application aimed at efficiently managing students' homework assignments.

Leveraging the Django framework, I am actively engaged in designing and implementing the entire application stack, encompassing both the front-end and back-end components. This project entails creating a user-friendly interface for students to track their homework assignments while also providing educators with a robust platform to create, update and delete tasks. The web app will be designed to streamline communication between students and teachers, enhancing the overall educational experience at the School. My role involves coding, database management, and ensuring the system's security and scalability, all with the goal of simplifying the homework management process for both students and faculty members.
